[The Dreamer's Dictionary](#) includes over a thousand dream symbols and their in-depth meaning in the Universal Language of Mind. Based on decades of research conducted by the School of Metaphysics, the people who sponsor www.dreamschool.org and the annual National Dream Hotline®, this is the book that answers the most commonly asked questions about dreams while teaching you how to understand your own. From lucid dreaming to precognition to enhancing dream recall, this book has been a steadfast seller for two decades.

SECTION 1 - provides wide-ranging and fascinating historical, spiritual and psychological insights into the workings of the subconscious mind in the dream state.

SECTION 2 - Over 1000 entries from abbey to money to zoo translated from English into the Universal Language of Mind. Plus thoughts to consider for interpretation and personal significance of your dreams.

SECTION 3 - focuses on the art of interpreting dreams including possible responses to communication received while in the dream state.

Each one of us was taught and has learned English. Otherwise writing and reading this book would be very difficult, if not impossible. If this book was penned in a language foreign to you, you would see strings of letters and symbols unfamiliar to you -- characters without meaning. You wouldn't identify them as words so you wouldn't be able to assess any meaning to them. Communication would not occur. This is often what happens with our dream states. Communication does not break down, rather it does not occur because the outer mind and the inner mind do not speak a language common to both of them. -- The Dreamer's Dictionary

The Art of Hand Crafting

A selection of SOM Publishing books are hand crafted by teachers and students at the School of Metaphysics, and have been for over 40 years. Holding one of these booklets is an energetic experience. From the author to a student who does layout and design, the message of each book is enlivened with purposeful attention. An offset printer is housed at the School of Metaphysics World Headquarters requiring a master of printing to oversee this stage development. Pages are then cut on a giant paper cutter, collated and stapled by students and delivered to SOM bookstores throughout the midwest United States. Each step of creation is intentional and thoughtful. Collating 1000's of books is often done during large student gatherings.

by Pamela Blosser

Would suggest that this one begin to perceive meditation as the thoughts that populate this one's thinking. It is where this one lives moment to moment as much as it is where this one might go to. (10999BGC5)

Consider that wherever you are in your thinking is your meditation. The question then arises, what quality of meditation do you want? Do you want scattered meditation? Uplifting meditation? Calm meditation? This book explores 7 simple steps to improve meditation in a life changing way.
